The Doctor of Acupuncture (DAc) with a Specialization in Chinese Herbal Medicine Degree Program

The Doctoral Program is an evolution of the Master's Degree curriculum with an emphasis on advanced clinical competencies together with Chinese Herbal Medicine. The DAc degree program totals 3,450 hours (192 credits) of standards in integrative and collaborative healthcare case management, evidence-informed practices, biomedical diagnosis, acupuncture therapeutics, and Chinese herbal medicine. To foster critical thinking while enhancing professional development, advanced courses on Research of Oriental Medicine, Thesis Research, Diagnostic Testing and Collaborative Care were added to strengthen the curriculum.

Students will have opportunities to treat patients at a hospital setting clinic. The advanced competencies are designed to equip our doctoral students to effectively communicate with patients, other health care providers, and the community about the safety, efficacy, and principles of AOM, including both classical theories and modern research. Furthermore, the DAc program will provide advanced training on causes and manifestations of disease according to both Chinese and Western medicine.

The DAc program will critically assess the methodology and conclusions of quantitative and qualitative research. Doctoral students will participate in a healthcare system that is multidisciplinary and collaborate in a team-based approach across all healthcare disciplines. Training will include identifying conditions requiring referral for emergency medical care, biomedical consultation and diagnostic testing, long-term case management, or the services of other health care providers.
